	Roles granted to a NCB party:	38
	Roles granted to a NCB Administrator User	38
ANNEX 2	TIPS PARTICIPANT ROLES	38

1. Introduction

This brief guide is intended as an additional aid for the CRDM GUI user starting to configure the data under their responsibility, but its purpose is not, in any way, to substitute for the CRDM^{TIPS} UHB, where you will find all the needed information to use the GUI screens (e.g. needed privileges, types of users, business rules, etc.).

The document is divided into two main parts: the first is devoted to the reference data under the responsibility of the Central Bank; the second details the reference data that can be created directly by the TIPS Participants or Ancillary Systems. Please consider that all the data maintained by ~~the~~TIPS Participants or Ancillary Systems can be maintained by the relevant Central Bank.

In order to be able to instruct successfully in TIPS **all the reference data has to be configured correctly**, unless the relevant object is explicitly mentioned as optional.

In summary, the following actions have to be performed by a Central Bank:

1. Create a **Party**
2. Add the **Technical Address Network Service Links**
3. Create a **Party Service Link** to define the Party as a TIPS participant, ~~or~~ Reachable party or Ancillary System
4. Create a new **Administrator User** for the ~~participant~~TIPS Actor¹
5. Create the **Certificate DN user** for the TIPS Actor user~~participant~~
6. Create the **User-Certificate DN link** for the Administrator user
7. Create **Predefined Roles** for Admini~~strator users~~Users and TIPS ~~participants~~Actors
8. Grant the Administrator User with the “Administer Party~~Party administrator~~” role²
9. Create a non-administrator User for the Central Bank (only if additional CB users are needed)
10. Grant the CB non-administrator user with the relevant roles (only if additional CB users are needed)
11. Create the **Certificate DN** for the CB non-administrator user (only if additional CB users are needed))
12. Create the **User-Certificate DN link** for the CB non-administrator user (only if additional CB users are needed)
13. Create a **Cash Account** owned by a TIPS participant or Ancillary System
14. Define an **Authorised Account User** for the cash account (this step can also be performed by the ~~PMBK~~Payment Bank or Ancillary System)
15. Define a **DN-BIC routing** configuration (this step can also be performed by the Payment Bank or Ancillary System~~PMBK~~)
- ~~15-16.~~ Define a Billing configuration

While the following steps can be performed by a Payment Bank:

1. Grant the Admini~~strator~~strator user with the relevant roles

¹ A TIPS Actor can be of type Central Bank, TIPS Participant, Reachable Party and Ancillary System.

² Until the resolution of PBI 203438 it will not be possible for a CB to grant the CRDM_Access privilege to a TIPS participant user, so this has to be done by the TIPS Operator upon request of the Central Bank

2. Create a non-administrator User
3. Create the **Certificate DN** for the non-administrator user
4. Create the **User-Certificate DN link** for the non-administrator user
5. Grant the non-administrator user with the relevant roles
6. Define an **Authorised Account User** for the eCash Account
7. Define a **DN-BIC routing** configuration
8. Define a **CMB** on Cash Account (optional)
9. Define a **Limit** on the CMB (mandatory only if the CMB has been created)
10. Define the Reachable Party as Authorised Account User for the CMB (mandatory only if the CMB has been created)
11. Define a **Report Configuration** for the TIPS Participant or Ancillary System (optional)
12. Define a **Message Subscription Rule Set** for the TIPS Participant or Ancillary System (optional)
13. Define a **Routing** configuration for the TIPS Participant or Ancillary System (optional)
- 14.

1.1 Reference Data under Central Bank responsibility

1.1.1 Create Party³

- Go to the *Common / Parties / Parties / ~~SearchNew~~ screen-path* and click on the **New** button option. As an alternative path, go to the Common / Parties / Parties / Search screen and click on the New button. Then insert the requested data as shown in the screenshot below.
- Please **remember-note** that you have to insert all the *Party Technical Addresses* that will be used **by the created party** for A2A communication.

³ In case the Party already exists it is possible to Edit it directly and add the needed TANSL configuration.

1.1.4 Create a new Certificate Distinguished Name

- Go to the [Common / Access Rights Management / Certificate Distinguished Names / Search-New screen-path](#) and click on the **New** button option. As an alternative path, go to the [Common / Access Rights Management / Certificate Distinguished Names / Search](#) screen and click on the **New** button. Insert the Certificate Distinguished Name data and click on the **Submit** button.

The screenshot shows the Target Services web application interface. At the top, there is a user header for 'T2S OPERATOR USER 1' with session details. A navigation menu on the left lists various system components. A dropdown menu is open for 'Certificate Distinguished Names', showing options like '+ New', 'Search', and 'User Certificate Distinguished Name Links'. Below the menu, there is a section titled 'WHAT IS CRDM?' with a brief description of the service.

- Insert the Certificate Distinguished Name data and click on the **Submit** button.

This screenshot shows the 'CERTIFICATE DISTINGUISHED NAME NEW' form. The 'Certificate Distinguished Name' field contains the text 'CN=u2a-user5, OU=test, OU=t2s, O=trgtxetg, O=swift'. At the bottom of the form, there are three buttons: '+ Submit', 'x Reset', and 'x Cancel'.

This screenshot shows the same 'CERTIFICATE DISTINGUISHED NAME NEW' form, but now with a confirmation message. The 'Certificate Distinguished Name' field contains 'CN=u2a-user16, OU=test, OU=tijs, O=trgtxetg, O=swift'. On the right side of the form, there are three circular buttons: a green '+ Submit' button, a blue 'Reset' button, and a grey 'x Cancel' button.

- The Certificate Distinguished Name has been created

1.1.5 Create a User-Certificate Distinguished Name Link for the new User

- Go to the [Common / Access Rights Management / User Certificate Distinguished Name Links / Search/New screen path](#) and click on the **New** button option. As an alternative path, go to the [Common / Access Rights Management / User Certificate Distinguished Name Links / Search](#) screen and click on the **New** button.-

- Then insert the Login name of the User and the Certificate Distinguished Name you have created, then click on the **Submit** button⁴.
- **If the DN is not configured with Main User flag ticked to yes, the user won't be able to see TIPS GUI menu**

⁴ DNs can be linked, via User-Certificate DN Links with Main User flag set to TRUE, to multiple Users. These Users can belong to different Payment Bank parties, but there can be only one User for each Payment Bank that is the Main User for a specific DN. [For the time being, change of the Main user from True to False can be performed only via LLI.](#)

1.1.6 Create Roles for the TIPS ~~Participant~~Actor

The TIPS Operator has already granted to the Central Bank Party all the needed privileges through the agreed predefined roles for CBs (see Annex I).

The Central bank must create the TIPS roles as laid out in the List of Roles and Privileges for CBs and Account holders. Central Banks should not grant single privileges to any users but rather always create and grant the MTRSG-defined TIPS roles.

~~A subset of the privileges contained in the former roles can be assigned to the TIPS Participant, either directly or through Roles (except for the privileges starting with "TIP", which can only be granted to roles as per DRGP020). The creation of Roles can speed up the ARM process, thus a set of predefined roles for TIPS participants has also been agreed.~~

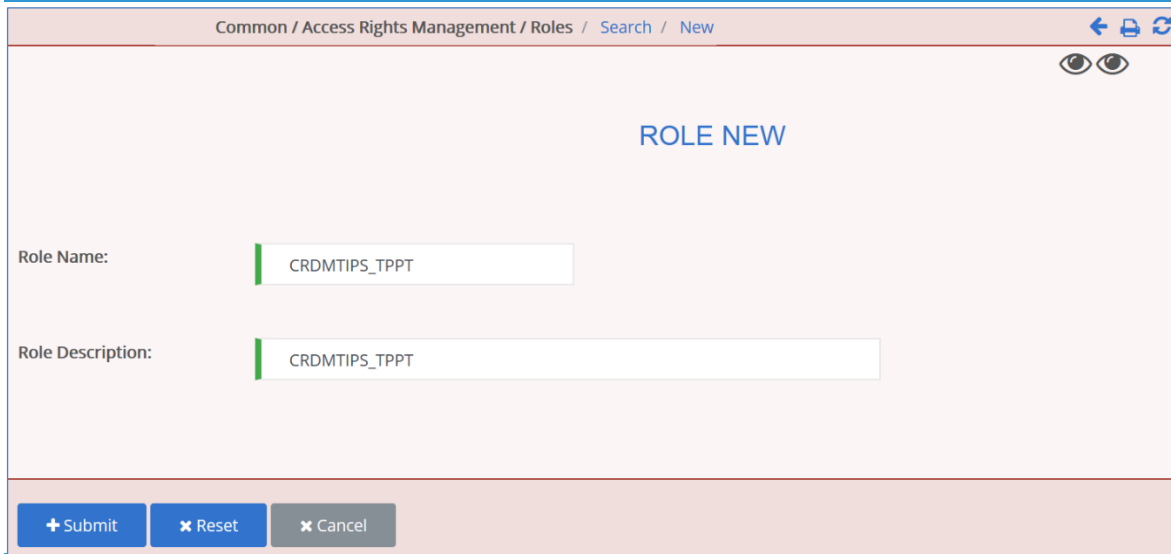

~~Please also consider that the TIPS privileges (TIP_ModifyAllBlocking, TIP_AdjustCMBLimit, TIP_InstantPayment, TIP_LiquidityTransfer, TIP_QueryAll, TIP_QueryReachable) cannot be bundled in a Role that contains non-TIPS privileges.~~

To create the predefined roles for a TIPS ~~participants~~Actor execute the following steps:

- go to the Common / Access Rights Management / Roles / ~~Search~~New screen and click on the **New** button option. As an alternative path, go to the Common / Access Rights Management / Roles / Search screen and click on the **New** button.

- Assign a Name and a Description to the Role and click on the **Submit** button

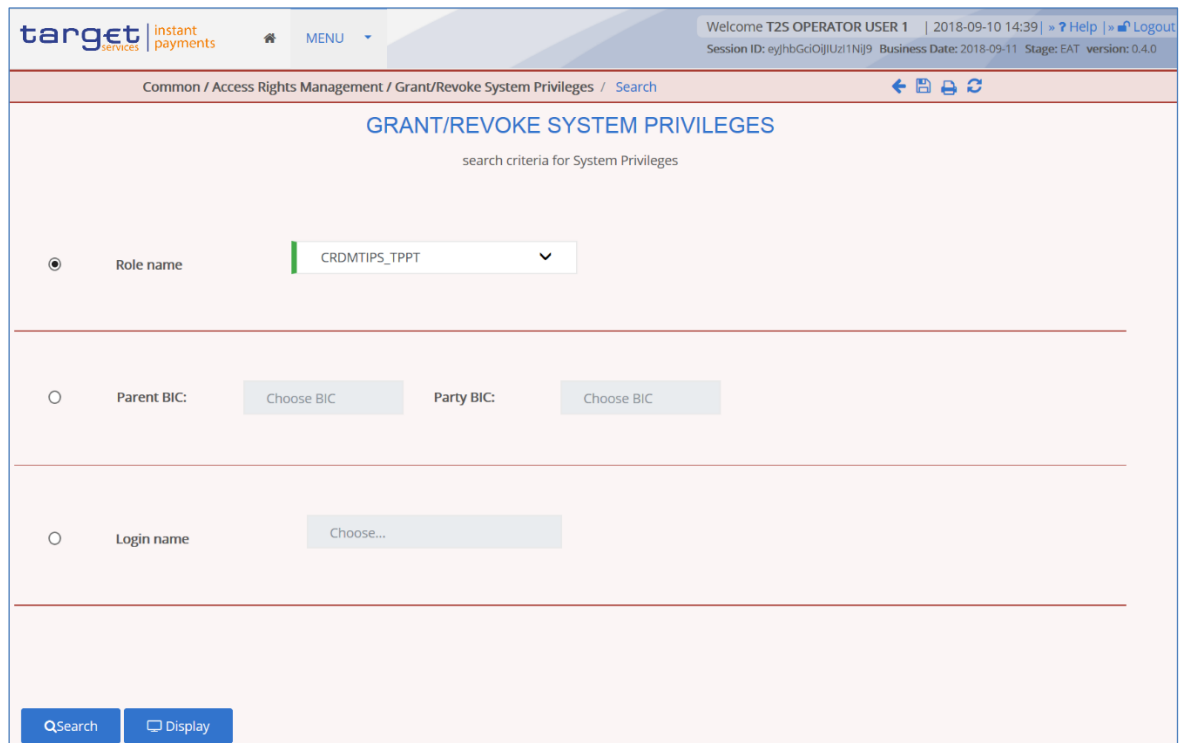

- The Role CRDMTIPS-REF-DATA-GUIDE⁵CRDMTIPS_TPPT has been successfully created

⁵ This is just a fake role name to show as an example

- Go to the Common / Access Rights Management / Grant/Revoke System Privileges / Search screen, select the *Role name* radio button, choose the newly created role from the drop down menu and click on the **Search** button

Common > Access Rights Management > Grant/Revoke Roles > Search

GRANT/REVOKE ROLES

Role

Role name:

Party

Parent BIC: Party BIC:

User

Login name:

- Select the *Party Administrator* and the *CRDM-Access* roles and grant them to the Administrator User
- Please note that **only** the following 7 privileges can be granted by a CB user to a TIPS participant Actor user (either directly or via roles): ARM_AdministerParty, ARM_GrantPrivilege,

ARM_GrantRole, ARQ_GrantedSysPrivilegesListQuery, ARQ_GrantObjectPrivilegesListQuery, ARQ_GrantedRolesListQuery, CRDM_Access⁶

Alternatively, to grant the same Roles to more Administrator Users at the same time:

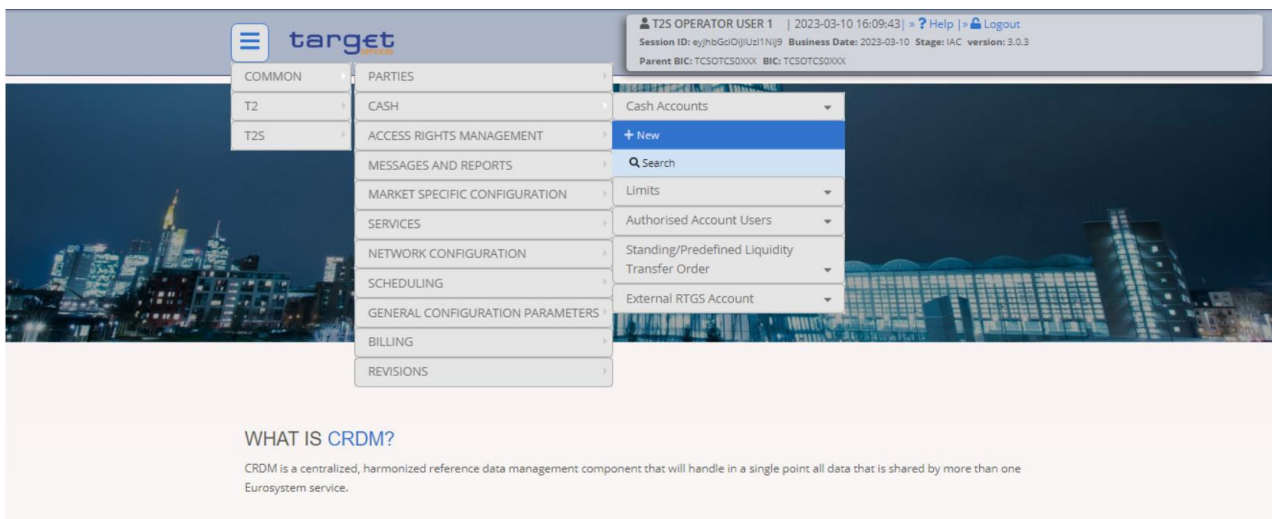

The following actions need to be done for both the (i) Party Administrator and the (ii) CRDM-Access roles:

- o Go to the Common / Access Rights Management / Grant/Revoke Roles / Search screen and select the Role to be granted. Then click on the **Search** button
- o Select one or multiple Administrator Users on the left side of the screen, then click on the **upper-right arrow**.
- o The Role ~~has is been~~ granted to all the selected Administrator Users

1.1.9 Create Cash Account for which the TIPS Participant Actor is the owner

For TIPS Participant:

- Go to the CommonTIPS / Cash / Cash Accounts / SearchNew screen-path and click on the **New** button option. As an alternative path, go to the Common / Cash / Cash Accounts / Search screen and click on the New button.

- Define the new Cash Account for party NCBXSKMMXXRR001/PBBKSKMM016RR102 as indicated on the screen below. Please remember that the *Opening* and *Closing dates* of the Cash Account cannot exceed the validity dates of the Owner Party.

⁶ The CRDM-Access role will only include CRDM Access privilege. The Party Administrator role will include the remaining six privileges. Until the resolution of PBI-203438 it will not be possible to grant the CRDM_Access privilege to a TIPS participant user, so this has to be done by the TIPS Operator upon request of the Central Bank.

Valid From: Valid To:

- The AAU has been created.
- **Please remember that the selected BIC PBBKSKMM016RR111 cannot be authorised for any other TIPS Cash Account or CMB in the same validity period, while Account INSKEURPBBKSKMM016RR101 can have more Accounts-BICs defined as AAU. Banks may decide to have their "Main BIC" reachable on the TIPS ASTA of their ACH or on their TIPS DCA and also use a secondary BIC for the other account.**

1.1.11 Define a DN-BIC Routing configuration for the AAU

This step can also be performed by Payment Banks for the BIC which currently identifies their own Party.

- Go to the [Common / Network Configuration / DN -BIC Routing / SearchNew screen path](#) and click on the **New** button option. As an alternative path, go to the [Common / Network Configuration / DN BIC Routing / Search](#) screen and click on the **New** button.

- Define the data as shown in the screenshot below and click on the **Submit** button.

This configuration is needed both to define DNs authorised to instruct payments and DNs authorised to receive payments on the Beneficiary side.

Please consider that in case the Direction is Outbound there can be only one Distinguished Name linked to a specific BIC11 for a certain validity period. Please remember also that the BIC (mandatory) field only shows BIC that have an AAU already set.

Moreover, the Distinguished Name must already be linked via a User-Certificate DN link to an A2A user belonging to the party BIC used for the routing.

1.1.12 Billing configuration

This section must to contains all steps to configure CRDM data for propagation in BILL. In order to fully configure System Entities and Participants, the following CRDM reference data objects need to be defined:

- [Invoice Configuration;](#)
- [Routing Configuration;](#)

- [Message Subscription Rule Set and Message Subscription Rule.](#)

The following sections show the main configuration steps for each of these CRDM objects. They refer only to the relevant fields for BILL configuration related to TIPS Service. configure the BILL module and to subscribe for the relevant messages and reports and to ensure that the correct account (CLM MCA) is debited after the TIPS Invoice is generated.

For additional details on specific field's usage please refer to the official UDFS and UHB documentation for CRDM and BILL Common Components published on ECB website.

1. Invoice Configuration

For TIPS Central Bank:

- Go to the *Common / Billing / Invoice Configuration / New* path and click on the **New** option. As an alternative path, go to the *Common / Billing / Invoice Configuration / Search* screen and click on the **New** button.

- Insert the most relevant TIPS related data⁷ as shown below.
 - o [TIPS Service as Service](#)
 - o [Parent BIC and Party BIC identifying the Central Bank](#)
 - o [Consumption Message⁸](#)
 - o [Direct Invoicing⁹](#)

⁷ Please note that *Annual Amount Threshold* is a mandatory field and must be filled in even if not relevant for TIPS (e.g. 100,000). *Invoice Address* and *Invoice Template* sections need to be filled in before submitting the creation request. For additional details on specific field's usage please refer to the official UDFS and UHB documentation for CRDM and BILL Common Components published on ECB website.

⁸ It need to be set to 'Yes' in order to receive camt.077 CONS; 'No' otherwise.

⁹ It need be set to 'Yes' in order to let BILL activate direct invoicing for the system entity; 'No' otherwise. In case 'Yes' is selected, to guarantee the correct functioning of the billing process, all participants of the system entity must have a valid invoice configuration.

Service: TIPS SERVICE

Parent BIC: TCSOTCS0XXX Party BIC: NCBXSMMXXX

Consumption Message: Direct Invoicing:

Tax Exempt: Annual Amount Threshold: 1,700,000

VAT ID: Tariff:

Invoice Address

Street: House Number: Country Code: City: Postal Code: State or Province: Phone Number: Fax Number: Email Address:

Street	House Nu...	Country C...	City	Postal Code	State or Pr...	Phone Nu...	Fax Number	Email Addr...
Main street	11	SK	Bratislava	12345				

- Then click on Submit button. The **Invoice Configuration for the Central Bank** is now active.

For TIPS Participant or Ancillary System:

- Go to the Common / Billing / Invoice Configuration / New path and click on the **New** option. As an alternative path, go to the Common / Billing / Invoice Configuration / Search screen and click on the **New** button.
- Insert the most relevant TIPS related data¹⁰ as shown below.
 - o TIPS Service as Service
 - o Parent BIC and Party BIC identifying the TIPS Participant or Ancillary System
 - o Direct Charging¹¹ flag and Cash Accounts for Direct Debit Invoice Configuration setup¹²

¹⁰ Please note that *Annual Amount Threshold* is a mandatory field and must be filled in even if not relevant for TIPS (e.g. 100,000). *Invoice Address*, *Invoice Template* and *Direct Debit Invoice Configuration* sections need to be filled in before submitting the creation request. For additional details on specific field's usage please refer to the official UDFS and UHB documentation for CRDM and BILL Common Components published on ECB website.

¹¹ It must be set to 'Yes' in order to allow the direct charging on configured accounts; 'No' otherwise.

¹² The Credited Account of the Direct Debit Invoice Configuration must refer to an open, existing and active Cash Account instance in CRDM that belongs to the same System Entity of the Linked Party. The Debited Account of the Direct Debit Invoice Configuration must refer to an existing Cash Account instance in CRDM with type "Main Cash Account", not necessarily under the CB datascope.

2. Routing Configuration for Billing

For TIPS Central Bank:

- Go to the Common / Network Configuration / Routing / New path and click on the **New** option. As an alternative path, go to the Common / Network Configuration / Routing / Search screen and click on the **New** button.

- Insert the most relevant TIPS related data as shown below.

- Select a TIPSBILL.XXX Network Service¹³
- Parent BIC and Party BIC identifying the Central Bank
- Select a Party Technical Address already defined at Party level and linked to the Network Service selected above
- Select the flag Default Routing¹⁴

¹³ To allow the reception of camt.077 generated by the system (INVC and CONS) the Network Services are 'TIPSBILL.XXX.FILESNF' and 'TIPSBILL.XXX.MSGSNF'. To allow A2A BILL query feature (ITEM and CUMU) the Network Services is 'TIPSBILL.XXX.MSGRT'.

¹⁴ It must be set to 'Yes' since at least one default routing has to be defined. In case of conditional routing set up the flag must be set to 'No' and it must be defined the 'Message Type' for which a dedicated routing path is needed.

- Then click on Submit button. The **Routing Configuration for the Central Bank** is now active.

For TIPS Participant or Ancillary System (this step can also be performed by TIPS Participant or Ancillary System):

- Go to the [Common / Network Configuration / Routing / New](#) path and click on the **New** option. As an alternative path, go to the [Common / Network Configuration / Routing / Search](#) screen and click on the **New** button.
- Insert the most relevant TIPS related data as shown below.
 - o [Select a TIPSBILL.XXX Network Service](#)¹⁵
 - o [Parent BIC and Party BIC](#) identifying the TIPS Participant or Ancillary System
 - o [Select a Party Technical Address](#) already defined at Party level and linked to the [Network Service](#) selected above
 - o [Select the flag Default Routing](#)¹⁶

¹⁵To allow the reception of camt.077 generated by the system (INVC and CONS) the Network Services are 'TIPSBILL.XXX.FILESNF' and 'TIPSBILL.XXX.MSGSNF'. To allow A2A BILL query feature (ITEM and CUMU) the Network Services is 'TIPSBILL.XXX.MSGRT'.

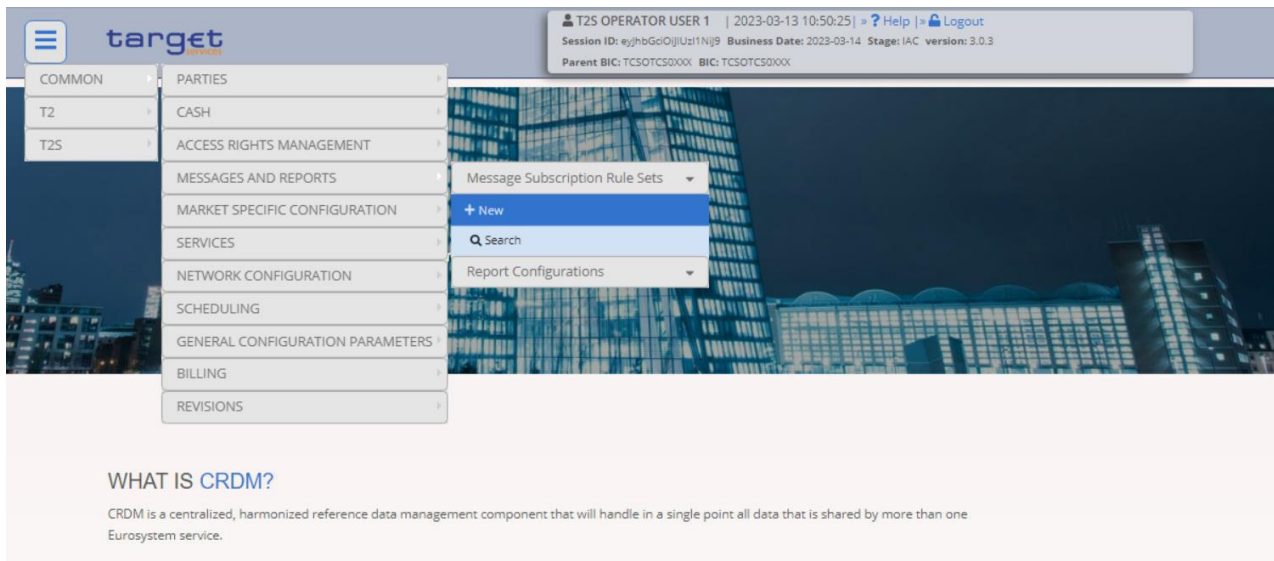

¹⁶ It must be set to 'Yes' since at least one default routing has to be defined. In case of conditional routing set up the flag must be set to 'No' and it must be defined the 'Message Type' for which a dedicated routing path is needed.

- Then click on Submit button. The **Invoice Configuration for the TIPS Participant or Ancillary System** is now active.

3. Message Subscription Rule Set/Rule Configuration for Billing

For TIPS Central Bank:

- Go to the **Common / Messages and Reports / Message Subscription Rule Sets / Search** screen and click on the **New** button. As an alternative path, go to the **Common / Messages and Reports / Message Subscription Rule Sets / Search** screen and click on the **New** button.

- Insert the most relevant TIPS related data as shown below.
 - o TIPS Service as Service
 - o Parent BIC and Party BIC identifying the Central Bank as Creator Party
 - o Parent BIC and Party BIC identifying the Central Bank as Interested Party
 - o The positive flag as Positive/Negative parameter set value

The screenshot displays the 'MESSAGE SUBSCRIPTION RULE SET DETAILS' page in the Target system. The top navigation bar includes the Target logo and user information: 'NCBXSMM00X User1 | 2023-03-16 12:29:31 | Help | Logout'. Below the navigation, the page title is 'MESSAGE SUBSCRIPTION RULE SET DETAILS'. The main content area is divided into several sections:

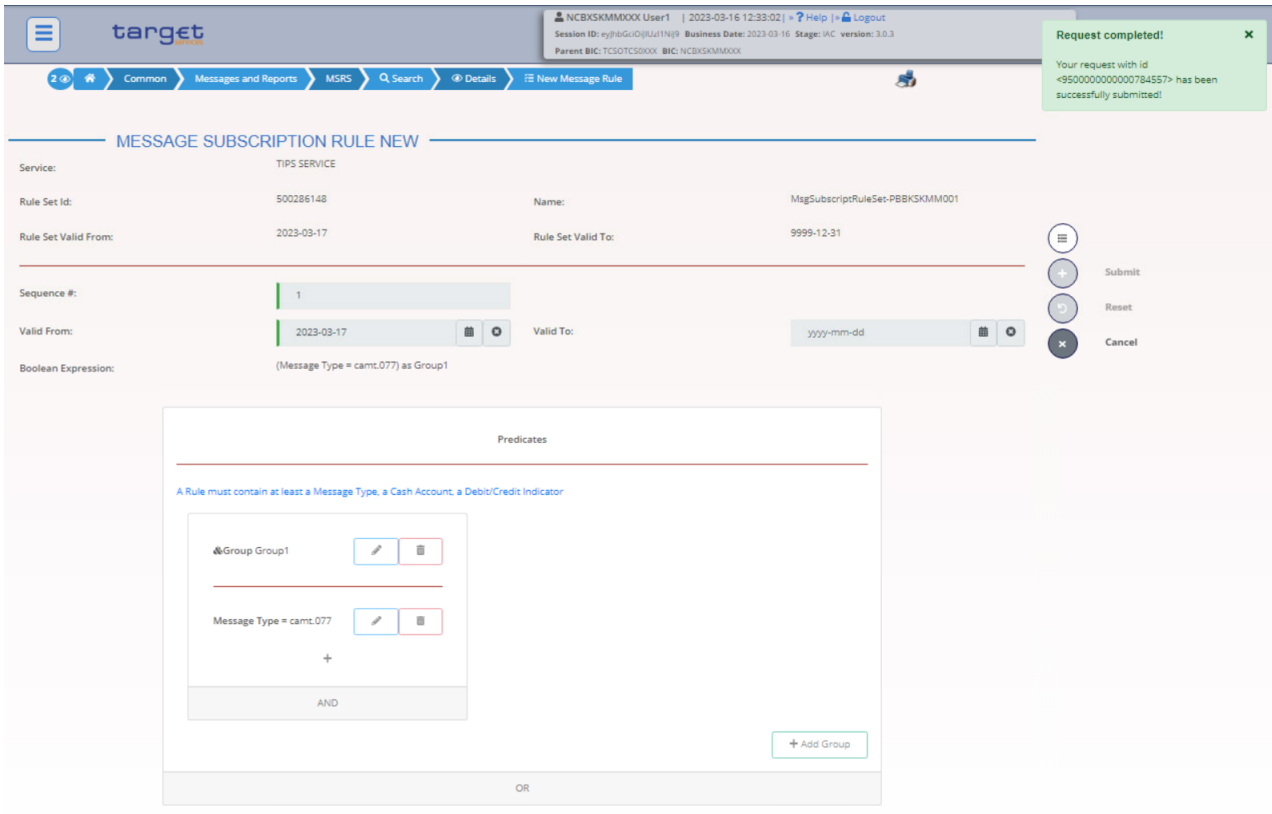

- Metadata:** A grid of key-value pairs including Status (Active), Rule Set Id (500286148), Description (MsgSubscriptRuleSet-PBBKSMM001), Valid From (2023-03-17), Creator Parent BIC (TCSOTCS00XX), Service (TIPS SERVICE), Name (MsgSubscriptRuleSet-PBBKSMM001), Positive/Negative parameter set (Positive), Valid To (9999-12-31), and Creator Party BIC (NCBXSMM00X).
- Interested Parties:** A table with two columns: 'Parent BIC' and 'Party BIC'. One row is visible with Parent BIC 'NCBXSMM00X' and Party BIC 'PBBKSMM001'. Below the table, it states 'Total rows: 1'.
- Rules:** A section with a 'Status' dropdown menu set to 'Active'. Below it is a table with columns: 'Status', 'Seq', 'Rule', 'Valid From', 'Valid To', and 'Rule Boolean Expression'. The table is empty, with the text 'No Rows To Show' centered. Below the table, it states 'Total rows: 0'. At the bottom right of this section are buttons for 'Revisions' and '+Add Rule'.

On the right side of the page, there is a vertical toolbar with icons for 'Edit', 'Delete', 'Restore', and 'Revisions'.

- [Click on the **Add rule** button under section **Rules**](#)
- [Then add the **Sequence**, **Valid from** and **Valid to** values, then click on the **Add Group** button.](#)
- [Define the **Group** name and then Click on the **+ icon**. Then choose the **Message type camt.077** from the drop down menu and click on the **Ok** button](#)

- Then click on **Submit** button. The **Message Subscription Rule for the TIPS Participant or Ancillary System** has been created

1.2 Reference data under TIPS Participant Actor responsibility

1.2.1 ~~Complete the TIPS Participant Admin access rights configuration~~

A TIPS Participant Administrator can only be granted with the Party Administrator role by its relevant CB. This role only contains the ^{7¹⁸} basic privileges to access the CRDM GUI and to execute administrative actions on Access Rights Grant roles and privileges. This means that, as a first step, **the Admin user has to enter the GUI and grant himself any other needed privileges and roles**. For example the “PB Access rights administrator – Advanced” which is necessary for the Admin to proceed with creating new users, new Certificate DNs and new User-Certificate DN links. In order to do so:

- Go to the Common / Access Rights Management / Grant / Revoke Roles screen and select from the Login name radio button the Administrator user, then click on the **Search** button.

¹⁸ Currently only 6, due to PBI 203438

— Select the relevant role (e.g. PB Access rights administrator – Advanced) and grant it to the Admin user

Alternatively, to grant the same Role to more Users at the same time:

- Go to the Common / Access Rights Management / Grant / Revoke Roles / Search screen and select the Role to be granted. Then click on the **Search** button
- Select one or multiple Users on the left side of the screen, then click on the upper arrow.
- The Role has been granted to the Users

1.2.21.2.1 Create a non-Administrator user for the TIPS Participant Actor Party

- Create a new user (e.g. USER2 SKPB0016) by filling out all the relevant fields:

1.2.3 Complete the TIPS Actor Admin access rights configuration

A TIPS Actor Administrator can only be granted with the Party Administrator role by its relevant CB. This role only contains the 7 basic privileges to access the CRDM GUI and to execute administrative actions on Access Rights. This means that, as a first step, **the Admin user has to enter the GUI and grant himself any other needed privileges and roles**. For example the “PB Access rights administrator - Advanced” which is necessary for the Admin to proceed with creating new users, new Certificate DNs and new User-Certificate DN links. In order to do so:

- Go to the *Common / Access Rights Management / Grant/Revoke Roles* screen and select from the *Login name* radio button the Administrator user, then click on the **Search** button.

The screenshot shows the 'GRANT/REVOKE ROLES' configuration screen in the TIPS Actor Admin GUI. The breadcrumb trail is 'Common > Access Rights Management > Grant/Revoke Roles > Search'. The page title is 'GRANT/REVOKE ROLES'. There are three main sections: 'Role', 'Party', and 'User'. The 'Role' section has a radio button and a dropdown menu labeled 'Role name:' with the text 'Choose Role...'. The 'Party' section has two radio buttons and two dropdown menus labeled 'Parent BIC:' and 'Party BIC:', each with the text 'Choose BIC'. The 'User' section has a radio button and a text input field labeled 'Login name:' containing the text 'PBBKSKMM016 AdminUser1'. At the bottom, there are 'Search' and 'Display' buttons.

- Select the relevant role (e.g. PB Access rights administrator - Advanced) and grant it to the Admin user

Alternatively, to grant the same Role to more Users at the same time:

- Go to the *Common / Access Rights Management / Grant/Revoke Roles / Search* screen and select the Role to be granted. Then click on the **Search** button
- Select one or multiple Users on the left side of the screen, then click on the upper arrow.
- The Role has been granted to the Users

1.2.4 Create a User Certificate Distinguished Name Link for the new User

- Go to the *Common / Access Rights Management / User Certificate Distinguished Name Links / SearchNew* screen path and click on the **New** option button. As an alternative path, go to the *Common*

[/ Access Rights Management / User Certificate Distinguished Name Links / Search](#) screen and click on the **New** button. Then insert the Login name of the User and the Certificate Distinguished Name you have created, then click on the **Submit** button¹⁹.

- **If the DN has not been flagged as Main User, the user will not be able to see TIPS GUI menu**

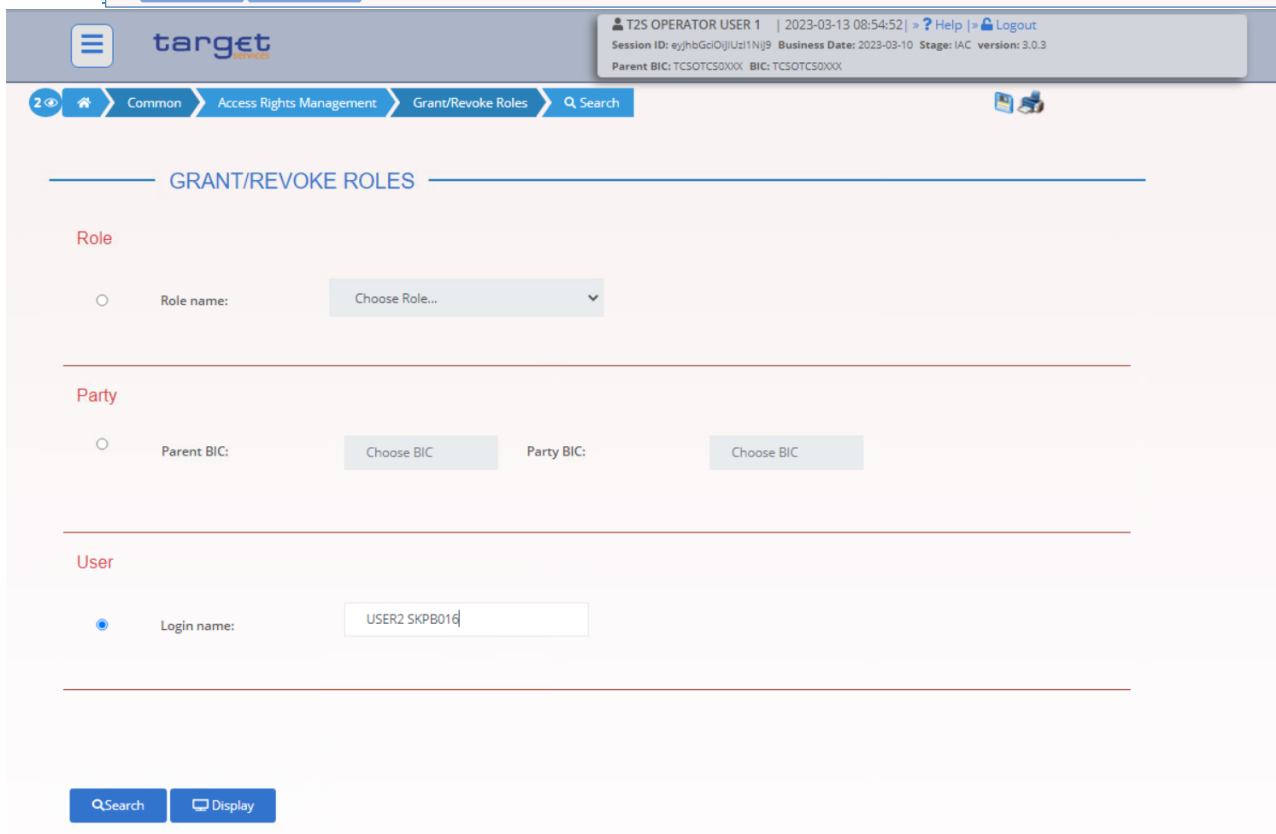

The screenshot shows the 'USER CERTIFICATE DISTINGUISHED NAME NEW' form in the Target TIPS GUI. The form fields are: Login Name: USER2 SKPB016; Certificate Distinguished Name: CN=u2a-user2pb16, OU=test, OU=tips, O=trgtxtetg, O=swift; Default: ; Main User: . The 'Submit' button is highlighted. A green notification box in the top right corner states: 'Request completed! Your request with id <950000000000781005> has been successfully submitted!'. The top navigation bar shows 'Common > Access Rights Management > User Certificate Distinguished Name Links > + New'.

The screenshot shows the 'USER CERTIFICATE DISTINGUISHED NAME NEW' form in the Target TIPS GUI. The form fields are: Login Name: USER2 SKPB001; Certificate Distinguished Name: CN=u2a-user5, OU=test, OU=t2s, O=trgtxtetg, O=swift; Default: ; Main User: . The 'Submit', 'Reset', and 'Cancel' buttons are visible at the bottom. The top navigation bar shows 'Common / Access Rights Management / User Certificate Distinguished Name Links / Search / New'. The top right corner shows 'Welcome USER1 SKPB001 | 2018-09-10 15:40 | ? Help | ? Logout'.

1.2.5 Grant Privileges via Roles to the User

- Go to [Common / Access Rights Management / Grant/Revoke Roles / Search](#) screen, select the Login name Radio button and choose the newly created user from the drop down menu, then click on the **Search** button.

¹⁹ DNs can be linked, via User-Certificate DN Links with Main User flag set to TRUE, to multiple Users. These Users can belong to different Payment Bank parties, but there can be only one User for each Payment Bank that is the Main User for a specific DN. [For the time being, change of the Main user from True to False can be performed only via LLI.](#)

- Grant to the user the appropriate Roles

Alternatively, to grant the same Role to more Users at the same time:

- Go to the Common / Access Rights Management / Grant-/Revoke Roles / Search screen and select the Role to be granted. Then click on the **Search** button
- Select one or multiple Users on the left side of the screen, then click on the upper arrow.
- The Role has been granted to the Users

1.2.6 Define an AAU for the Dedicated Cash Account or Ancillary System Technical Account

- Go to the Common / Cash / Authorised Account User / New path and click on the **New** option.

- [As an alternative path, go to the Common / Cash / Authorised Account User / Search screen and click on the **New** button.](#) ~~TIPS / Cash / Authorised Accounts User / Search screen and click on the **New** button.~~
- Insert the data as shown in the screenshot below.

AUTHORISED ACCOUNT USER NEW

Authorised Account User BIC: Cash Account Number:

Valid From: Valid To:

- The AAU has been created.
- **Please remember that BIC ~~PBBKSKRR111~~ PBBKSKMM016 cannot be authorised for any other Account or CMB in the same validity period, while Account ~~INSKEURPBBKSKRR101~~ MM016 can have more Accounts defined as AAU.**

1.2.7 Define a DN-BIC Routing configuration for the AAU

- Go to the [Common / Network Configuration / DN BIC Routing / New](#) path and click on the **New** option. As an alternative path, go to the [Common / Network Configuration / DN BIC Routing / Search](#) screen and click on the New button~~[Common / Network Configuration / DN BIC Routing / Search](#) screen and click on the **New** button.~~
- Define the data as shown in the screenshot below and click on the **Submit** button.
- **This configuration is needed both to define DNs authorised to instruct payments and DNs authorised to receive payments on the Beneficiary side.**
- **Please consider that in case the Direction is Outbound there can be only one Distinguished Name linked to a specific BIC11 for a certain validity period. Please remember also that the BIC (mandatory) field only shows BIC that have an AAU already set.**
- **Moreover, the Distinguished Name must be linked via a User-Certificate DN link to an A2A user belonging to the party BIC used for the routing.**

1.2.8 Define a CMB on a Cash Account

- The definition of a CMB is not mandatory, however, if a CMB has been created, then the relevant Limits have to be defined too (see also next step).
- Login as non-administrator user USER2 SKPB001 and go to the [TIPS / Cash / Cash Accounts / SearchNew screen-path](#) and click on the **New** option button. *As an alternative path, go to the [Common / Cash / Cash Accounts / Search](#) screen and click on the **New** button.*

- Define the new CMB under Cash Account [ISKEURPBBKSKMM016](#) ~~NSKEURPBBKSKRR101~~ (whose Owner is the TIPS Participant) as shown on the screen below. Please remember that the Opening and Closing dates of the CMB cannot exceed the Validity dates of the Linked Account. CMB owner is TIPS Participant [NCBXSRR001](#)~~NCBXSMMXXX~~/[PBBKSKMM016](#)~~RR102~~.
- **Moreover, in order for a CMB to be propagated to TIPS, its Opening Date must be equal to the business date following the one in which it is created, at the earliest; this is despite the fact that CRDM allows the Opening Date to be set to the current business date at the moment of the creation.**

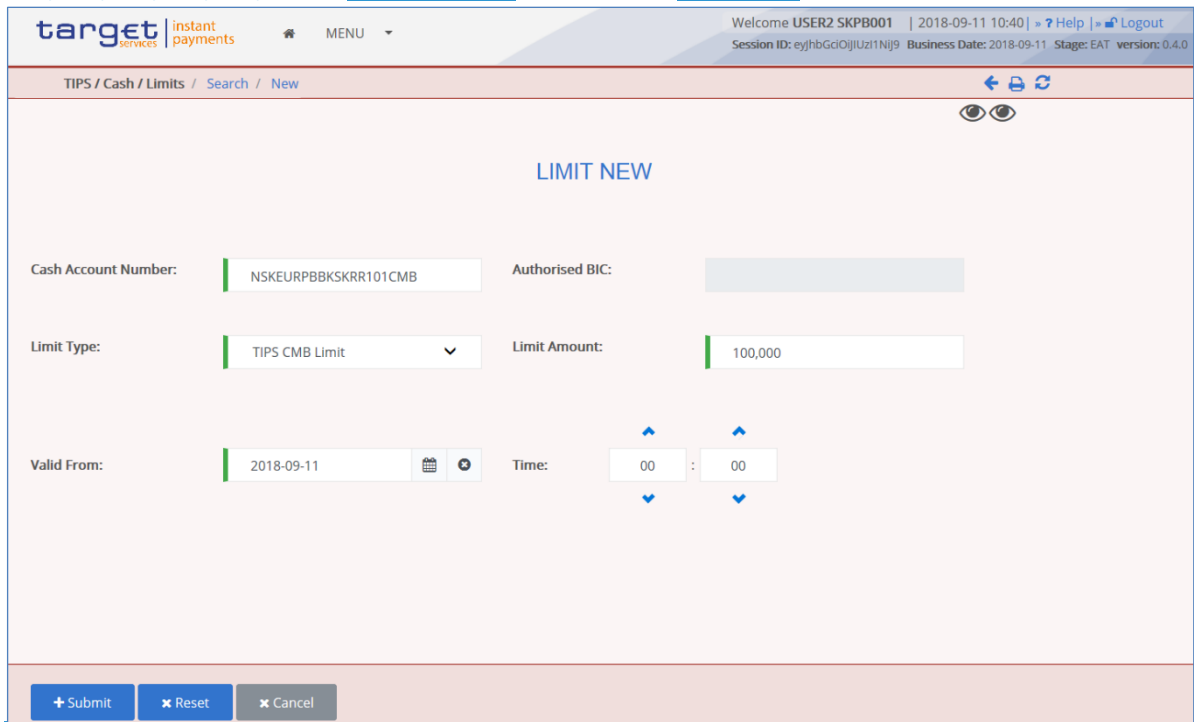

1.2.9 Define a Limit on the CMB

- The definition of a Limit is not mandatory, however, **if a CMB has been created, then the relevant Limits have to be defined too** (see also next step).
- Go to the [TIPS / Cash / Limits- / Search-New](#) pathscreen and click on the **New** option. As an alternative path, go to the [Common / Cash / Limits / Search](#) screen and click on the **New** button

button

- Insert the needed data as shown in the screenshot below, then click on the **Submit** button.
- **Please remember that in order to migrate the CMB data on TIPS (if the CMB has been created) it is compulsory to define a Limit.**
- In case the CMB must be unlimited, [dedicated flag need to be selected please insert 999,999,999,999,999](#) as [alternative to Limit Amount definition](#).

The screenshot shows the 'LIMIT NEW' form in the Target system. The form is titled 'LIMIT NEW' and contains the following fields and controls:

- Limit Type:** A dropdown menu set to 'TIPS CMB Limit'.
- Cash Account Number:** A text input field containing 'ISKEURPBBKSKMM016CMB01'.
- Authorised BIC:** An empty text input field.
- Limit Amount:** A text input field containing '50,000'.
- Unlimited:** A checkbox that is currently unchecked.
- Valid From:** A date input field containing '2023-03-14'.
- Valid To:** A date input field with a placeholder 'yyyy-mm-dd'.
- To Account BIC:** A dropdown menu set to 'Choose BIC'.
- Time:** Two time selection fields, each showing '00 : 00'.
- Buttons:** A 'Submit' button (green with a plus sign), a 'Reset' button (blue with a refresh icon), and a 'Cancel' button (grey with an X).

1.2.10 Define the Reachable Party as AAU for the CMB

- Go to the [TIPS / Cash / Authorised Accounts User New path](#) and click on the **New** option.
- As an alternative path, go to the [Common / Cash / Authorised Account User / Search](#) screen and click on the **New** button ~~Search~~ screen and click on the **New** button.
- Insert the BIC of the AAU (in this case it's the BIC11 of the Reachable Party), the Cash Account number (in this case the CMB created in previous steps), [then click on the Submit button.](#)
- **Please remember that each BIC11 can be linked to only one TIPS Account or CMB.**

- The Message Subscription Rule has been created. TIPS Participant ~~NCBXSRR001~~NCBXSMMXX/PBBKSKMM016RR102 will now receive payment notifications for the Cash Account ~~INSKEURPBBKSKMM016RR101~~ for which it is the owner.

1.2.13 Define a Routing configuration for the TIPS Participant or Ancillary System

- [This step is optional \(based on the actor needs\)](#)
- [Go to the *Common / Network Configuration / Routing / New* path and click on the **New** option. As an alternative path, go to the *Common / Network Configuration / Routing / Search* screen and click on the **New** button.](#)
- [Each Party can define a *default* routing configuration that is used when no specific routing conditions are defined for the same party and for a specific outgoing message \(via *conditional* routing\).](#)
- [Each *Routing* configuration enables the outbound communication for a Party via the relevant *Party Technical Address and Network Service*.](#)

[Two separate default Routing configurations linked to TIPSCRDM.XXX.MSGSNF \(and TIPSCRDM.XXX.FILESNF\) Network Service are needed for the TIPS Actor in order to correctly receive a configured Report/Repository that is sent by CRDM common component \(i.e. TIPS Directory\)](#)

- Insert the requested data as per screenshot below. It is worth highlighting that as a TIPS Actor user you can create a *Routing* configuration for your *Party* only. When the *Network Service* is selected, a *Technical Address* will be included in the list of selectable items only if it is defined as *Party Technical Address* and linked to the specific *Network Service* via *TANSL (Technical Address-Network Service Link)* in the related *Party* configuration (see Section 1.1.1.)

- The Routing configuration has been created successfully.
