### **Delivery of the ICM User Handbooks I and II, Version 4.0**

Dear Daniela

According to the agreed schedule, the 3CB are pleased to provide Level 2 with the updated version 4.0 of the

- **ICM User Handbook I** for SSP participants as well as the
- **ICM User Handbook II** – Additional Information for Central Banks.

Due to the high volume of data they contain, the aforementioned ICM User Handbooks are being provided on DARWIN.

The new version of the ICM User Handbooks is based on the previous version 3.0 delivered in September 2009. Furthermore the updated version is also predicated on the pre version of the ICM User Handbooks (extract related to the alternative access to SSP via Internet - CR 497).

They contain amendments related to the release V4.0 (11/2010) and adaptations concerning Level 2 comments on the version 3.0. In addition several of the screen shots have been replaced.

As usual the changes in comparison to version 3.0 are highlighted by revision marks. Changes incorporated into the already delivered pre version are also visible by same coloured revision marks.

In case you have any questions or remarks regarding these documents, the 3CB will of course remain at your disposal.

Best regards

[signed]

Jochen Metzger  
(on behalf of the 3CB)
