For the 2025 financial year, the OeNB needs to determine the direct and indirect services rendered and costs incurred in connection with supervisory activities. They serve as a basis for cost allocation by the Financial Market Authority (FMA), which in turn charges these costs to the audited institutions. The resulting supervisory costs have to be audited by the auditor in accordance with Article 37 Federal Act on the Oesterreichische Nationalbank (NBG) and reported to the FMA and the Federal Ministry of Finance.
