Contributors

Karl Aiginger, born in 1948, has been the director of the Austrian Institute of Economic Research (WIFO) since March 2005. He is a professor of economics at the University of Linz and he held a position of a visiting professor at Stanford University (1982 and 2002); the Massachusetts Institute of Technology (MIT, 1991); and the University of California Los Angeles (UCLA, 1997). He has contributed to the Austrian Advisory Council for Economic and Social Affairs and the Reform Dialogue of the Austrian Government. He has been a lead manager and contributor to the European Competitiveness Reports since 1998. He is the editor of the Journal of Industry, Competition and Trade (JICT, jointly with André Sapir). Key areas of research include industrial economics, industrial policy and competitiveness.

Josef Baumgartner, born 1964, is an economist at the Austrian Institute of Economic Research (WIFO) in Vienna, Austria. He was a lecturer at the Department of Economics at the University of Linz (Austria), and assistant professor at the Department of Economics at the Technical University Vienna. He studied economics and econometrics at the University of Linz, the Institute for Advanced Studies in Vienna and the Vienna University of Economics and Business Administration. His major research interests are macroeconomics, applied econometrics, business cycle and inflation analysis and forecasting. He participated in the “Eurosystem Inflation Persistence Network (IPN)” on behalf of the Oesterreichische Nationalbank.

Günther K. Chaloupek, was born on June 5, 1947 in Lower Austria. He received his doctorate degree from the University of Vienna in 1969 and his M.A. (economics) from the University of Kansas, Lawrence, Ks., U.S.A. Since 1971, he has been the director of the Economic Research Department of the Austrian Chamber of Labour. In addition, he is a member of the Advisory Council for Economic and Social Affairs; vice president of the Government Debt Committee. Günther K. Chaloupek has published numerous articles (in German and in English) in journals and contributions to books in the field of history of economic theory.

Jesús Crespo Cuaresma is an assistant professor in the Department of Economics at the University of Vienna, and holds a Ph.D. in economics from the University of Vienna. His research interests are in the field of time series analysis and macroeconometrics. He has published on these topics in international journals and books.

Ernst Glatzer (born in 1969) studied technical physics at the Vienna University of Technology and Economics at the Vienna University of Economics and Business Administration where he also received his Ph.D. in economics (2002). He held the position of an assistant professor at the Department of Statistics at the Vienna University of Economics and Business Administration from 1998 to 2000 and joined the Oesterreichische Nationalbank in 2000.

Ernest Gnan was born in Vienna in 1964. He received his Ph.D. in economics at the University of Economics and Business Administration, Vienna, in 1989. In 1987, he started out his professional career as an investment fund manager and joined the Oesterreichische Nationalbank as an economist in 1988. In 1992, he moved to the European Commission in Brussels and in 1994 to the European Monetary Institute in Frankfurt. In 1998, Ernest Gnan became Deputy Head of the Oesterreichische Nationalbank's Foreign Research Division and in 1999 Head of the Bank's Economic Analysis Division. He is a member of the European Central Bank's Monetary Policy Committee and a member of the Austrian Government Debt Committee. Ernest Gnan has been giving numerous lectures on issues related to macroeconomics, monetary union and European integration. Since 1999, he has been adjunct professor at Webster University Vienna, and since 2005 lecturer at the University of Vienna. His numerous publications cover macroeconomics; economic growth, monetary policy, economic, institutional and legal aspects of European Monetary Union, exchange rate policy, the European Monetary System, the ERM 2 and the international monetary system, the institutional status of central banks and the Austrian capital market.
